

Innsbruck Paragliding.

Redesigning the whole site — home, shop and legal pages — as a live GitHub Pages build.

Why the site needs a new home

The design has already been built — it just isn't live yet. This proposal covers turning that design into the live site your business actually runs on, hosted free on GitHub Pages.

01

Book in one glance

The flight request sits front and center on the hero — no digging for a contact form.

02

Feel like the flight

Bold photography and confident type carry the adventure, not just describe it.

03

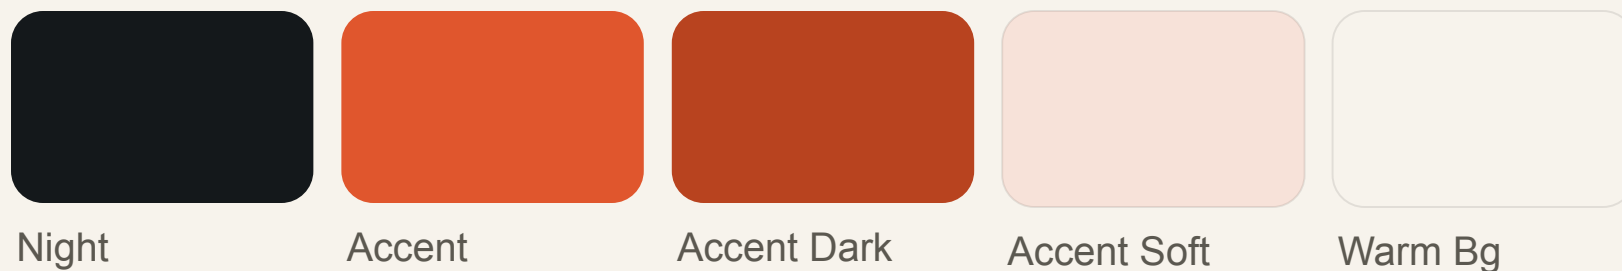

Manage it yourself

Small content changes are covered by 12 months of support after launch.

— DESIGN DIRECTION

Warm, confident, built for the outdoors

PALETTE

Night Accent Accent Dark Accent Soft Warm Bg

PHOTOGRAPHY

Full-bleed action shots over the Stubaital, shot in natural golden-hour light — the site should feel like being in the air, not reading about it.

TYPOGRAPHY

Display — Bricolage Grotesque

We make you fly.

Body — Plus Jakarta Sans

A paar Schritte auf der Wiese — den Rest übernehmen wir.

— KEY FEATURE

Book a flight in one step

Visitors pick a flight type and a date, then hit one button. It opens a pre-written WhatsApp message straight to you — no forms, no waiting on email.

It sits on the hero, so it's the first thing anyone sees.
